About Me

I am a B.Tech Computer Science student and a Full-Stack Web Developer, experienced in building scalable web applications, designing RESTful APIs, and managing databases. I focus on writing clean, secure, and maintainable code, and I am eager to contribute to innovation-driven, performance-focused web platforms.

Skills

- HTML,CSS
- Javascript
- Node.js
- Express.js
- REST API
- TailwindCSS
- React
- Next.js
- MongoDB
- Git & Github

Soft Skills

- Problem-solving
- Decision-making
- Teamwork
- Critical-thinking

Key Achievements

- **Achievement in Hackathons**

1. Qualified for the 2024 National Smart India Hackathon Round 1 Qualifier
2. Reached semifinals in the 2025 National Build with India Hackathon

Interests

- Open Source
- Frontend, Backend and Databases

Education

Computer Science and Engineering 2023-2027
K.D.K College of Engineering, Nagpur
CGPA : 7.01/10

Higher Secondary Certificate (HSC) 2022-2023
Bharti krishna Vidya Vihar,Nagpur
Percentage : 67%

Secondary School Certificate (SSC) 2020-2021
Bharti krishna Vidya Vihar, Nagpur
Percentage : 75%

Experience

Full Stack Web Developer
Freelance July 2025- Present

Provided freelance web development services to various clients.

- Delivered custom web applications for multiple clients, achieving 95% client satisfaction and meeting all deadlines.
- Followed clean coding practices to deliver secure, efficient, and maintainable solutions.

Web Developer
VirtuNexa Feb 2025- March 2025

- Contributed to the development of scalable full-stack web applications by following clean architecture principles.
- Integrated secure authentication and role-based access control across web platforms.

Projects

SmartTable - SaaS Timetable Management Platform

- Built a multi-tenant SaaS platform for schools and colleges with role-based access control (Admin, Scheduler, Teacher, Student) and 100% institution-level data isolation.
- Architected subscription-based billing with 14-day trial, Standard, and Flex plans, integrating Stripe subscriptions to handle upgrades, renewals, failures, and account suspension automatically.
- Developed a drag-and-drop timetable builder with real-time conflict detection (teacher overlaps, class collisions, subject constraints), improving scheduling accuracy by >90%.
- Implemented email authentication flows including email verification, password reset, and resend verification using Brevo Email API, strengthening security and onboarding reliability.

Scrap Collection Web Platform

- Developed a web platform for a local scrap collection business, enabling customers to request scrap pickup directly from the service provider.
- Designed an admin dashboard to manage scrap categories, pricing updates, and service requests.
- Created a responsive and user-friendly interface to improve accessibility for local users across devices.
